POWER X2™

TAKE CONTROL.

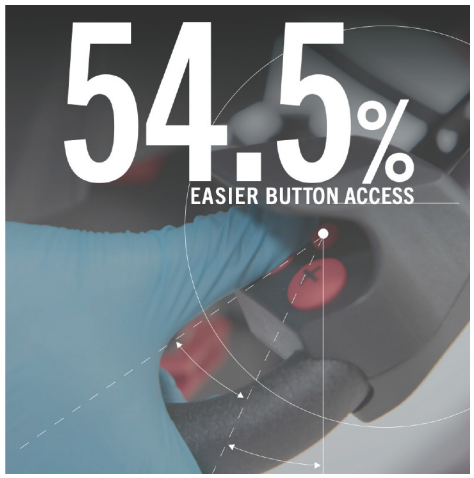

The power, stability and thoughtful design of the FERNO® POWER X2 Powered Stretcher give caregivers greater control through every stage of patient handling. From easier maneuverability and ergonomic controls to flexible side arms and extended battery endurance, POWER X2 is designed to reduce physical effort, support caregiver comfort and enhance the patient experience. These five technical studies demonstrate its performance advantages against the Stryker® Power-PRO™ 2 under the conditions tested.

Technical studies were conducted by FERNO in 2026 in a controlled environment under controlled conditions. Tests captured and compared represent the average from multiple tests under the same conditions to determine true comparative performance.
